DAMP PROBLEM SOLVED - CARING FOR YOUR HOME, AND YOUR HEALTH

Before UniSeal

After UniSeal

Damp is common problem here in Cyprus. In many cases, houses both old and new are built with no damp proofing whatsoever. Before you know it, you have unsightly marks and mould on the walls, flaking paint and a cold and unappealing property.

But it is not just the home that needs to be looked after - we need to be looked after if living in a home affected by damp. Damp can seriously aggravate respiratory problems, including bronchitis and asthma, as well as encouraging the emergence of spores and mould, so the effects of damp can be very serious for your home and your health.

All UniSeal Damp Proof Courses and Exterior Waterproof Coatings come with a 15 year guarantee, leaving you safe in the knowledge that your home will be protected for years to come.
