

UNISEAL - COMPLETE PROTECTION FOR YOUR HOME

Once you have moved into your dream home in the sun, as beautiful as it is, the sun and the rain inevitably begin to take their toll.

The exterior paintwork may need refreshing, you may have damp problems (because not all homes in Cyprus have been built with a damp proof course) or the rain and sun combined have taken their toll on your flat roof - or maybe all three!

UniSeal Services Ltd, the British weatherproofing company, can help you with any and all of these potential problems. As part of their unique service, UniSeal will firstly give your home a FREE 'health check' to see what, if any, work is needed. Then, any work that may be required is carried out to very high standard by their fully qualified workers and all works carry an amazing 15 year guarantee.

The UniSeal solution is simply explained and highly effective. For exterior paintwork, UniSeal Exterior Coatings are specially made to move with your property and will not chip, fade or peel and there are 50 beautiful colours to choose from. If your flat roof needs attention, UniSeal Roof Protection keeps out the elements and adds a thermal barrier. If damp is a big issue, UniSeal Damp Proof Courses will not only cure that problem for you but can also help save money on heating and maintenance bills in the future.
